

## INSTRUCTIONS FOR ASSEMBLING

1. Using scissors, cut out both disks along outline.
2. Carefully cut out black areas on each disk with a sharp stencil knife or single-edge razor blade.
3. For added protection brush or spray a coat of shellac or plastic on both sides of disks.
4. Fasten the two disks together with a dressmaker's snap-fastener. If you prefer to use a 3/16" eyelet cut out center hole indicated by dotted line. Snap-fasteners and eyelets may be obtained at the notions counter of a department store.

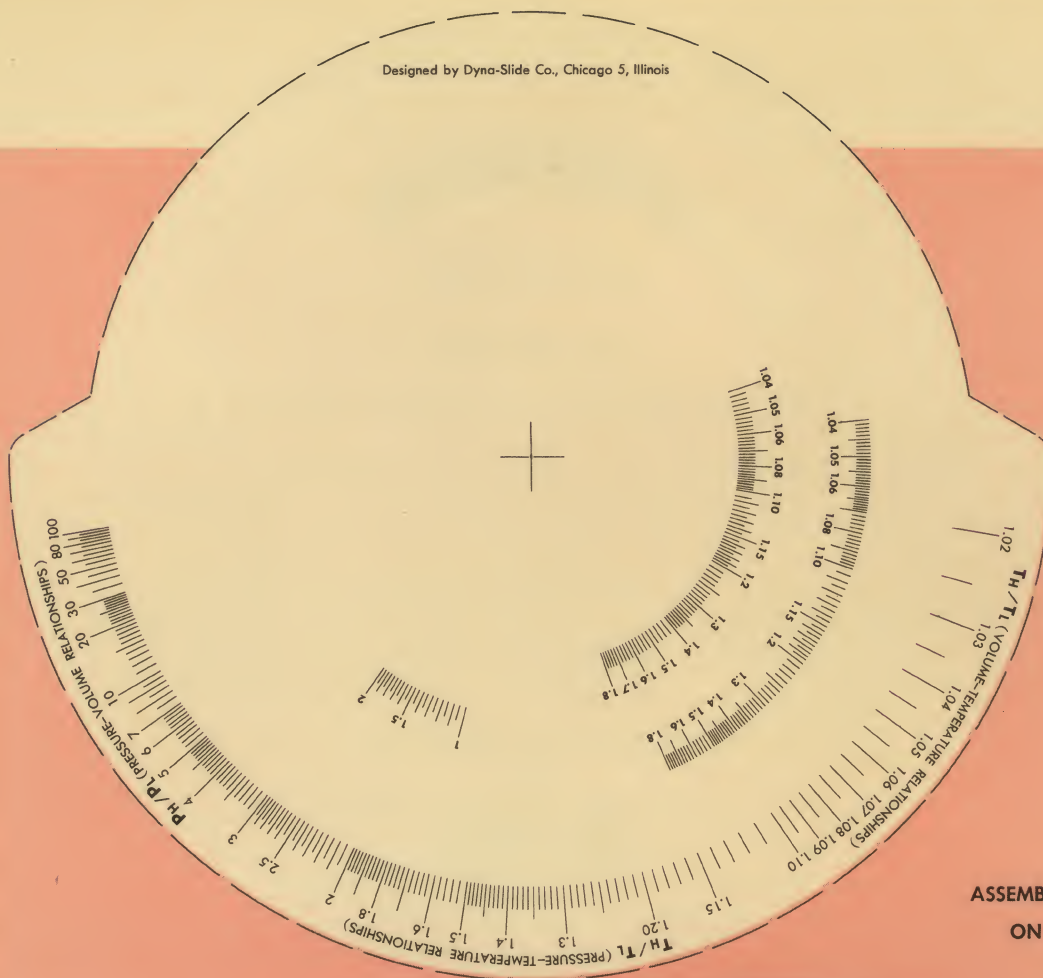

Get out the  
scissors —  
here's another one!

This  
double  
calculator  
solves six  
different  
equations

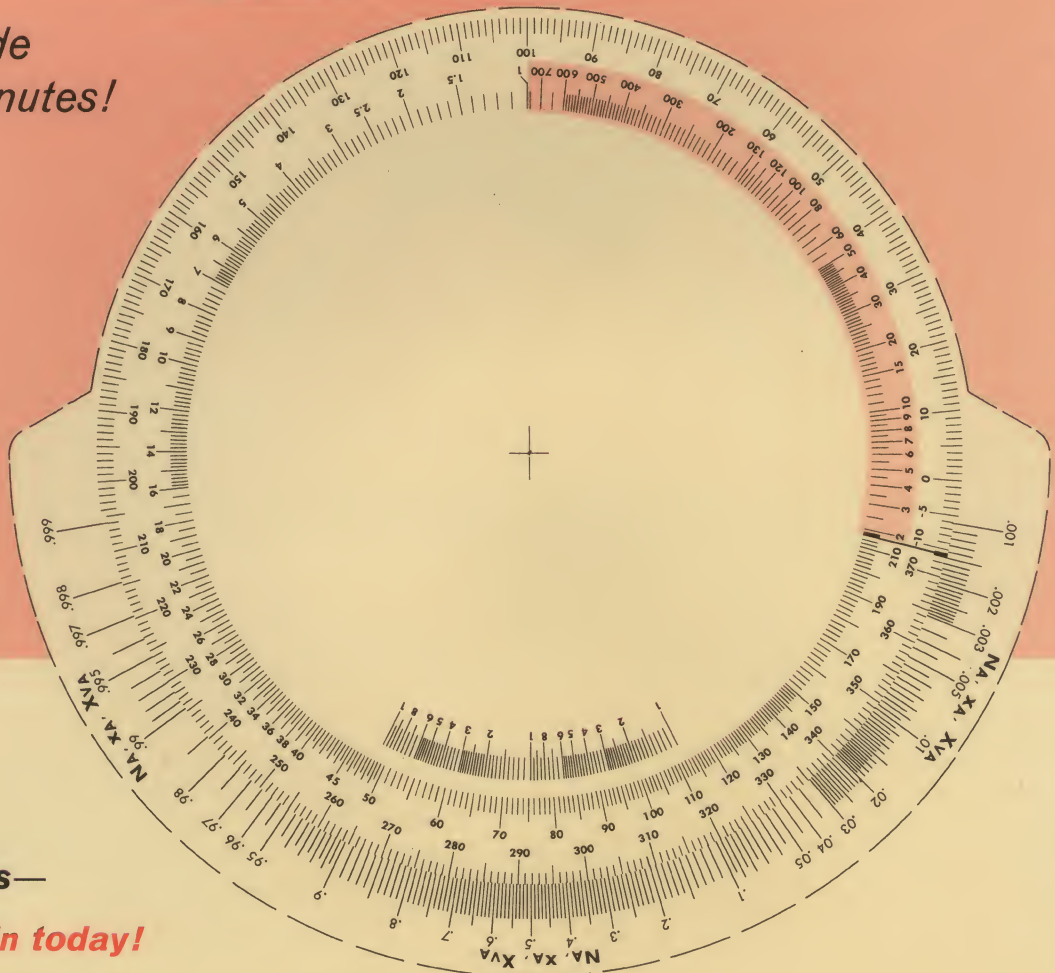

—each with  
a single setting!
